## Model 210D-1 compression dent removal system

The illumitronics model 210D-1 is designed to remove sidewall compression dents from three (3) piece cans. Three models cover cans ranging in size from 211 through 603. Operating on air pressure, the 210D-1 will quickly remove up to 65% of all sidewall dents on bright or labeled cans. The system will not remove chime dents.

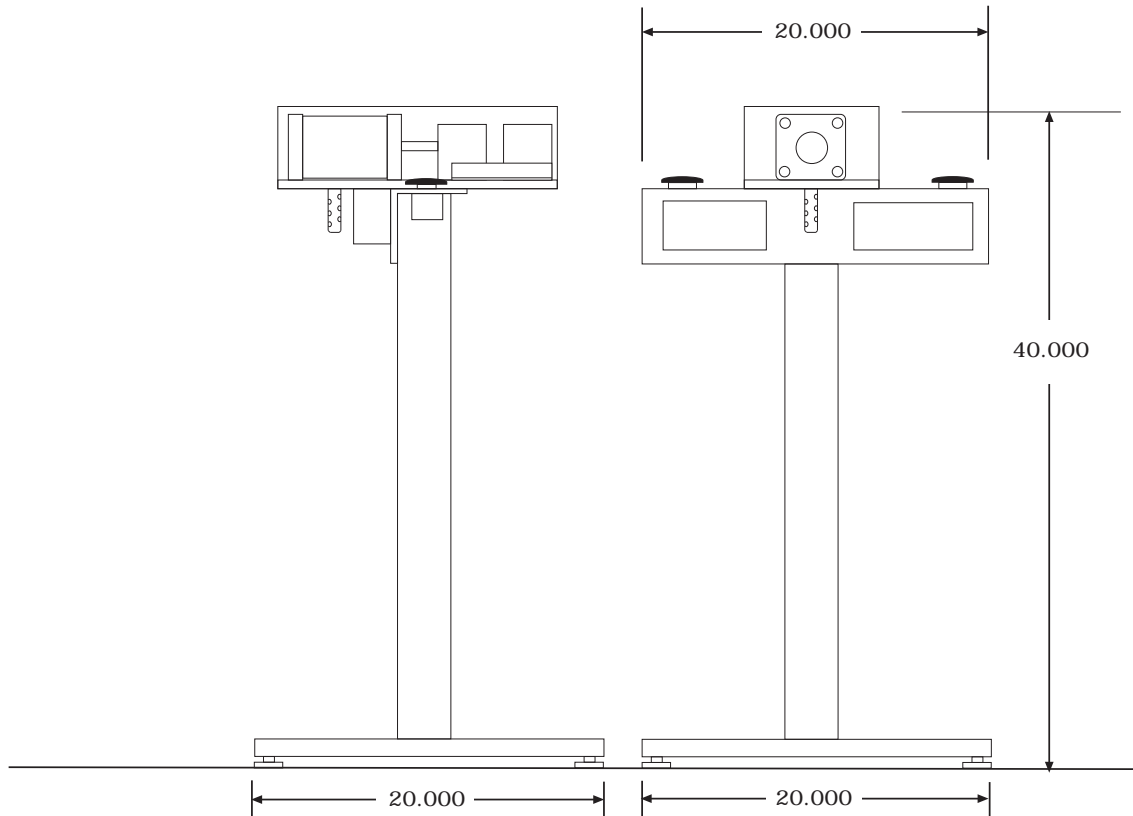

- Increase Production
- Remove 65% of sidewall dents
- Reduce dented can inventory
- Up to 500 cans per hour
- Easy to set up & operate
- Maintenance free operation
- Two (2) safety switch operation
- Can Sizes 211 through 603

**In seconds, cans once destined for the discount stores can now be returned to the production line.**
