illumitronics

Here's how it works !

You simply let us know that you will be trading in an ICORE unit when you place your order for a model 530M-4 or a 545CS-2 and we will deduct \$ 2,000- off the selling price of the new unit.

Once installation is completed, simply use the shipping crate from the new unit, pack up the old ICORE unit and return the ICORE to illumitronics (freight collect)

As the poster says, DEAD or ALIVE. This means that even if you have an old ICORE sitting on the "Bone Pile", it's worth \$ 2000-

illumitronics is making this offer in response to a growing number of canning operations requesting replacement parts for the older ICORE units. As Thermo/Ramsey no longer manufactures or supports this equipment, parts are becoming harder and harder to find. illumitronics has a limited supply of parts and once these are gone the ICORE units will be unserviceable.

This offer will only be available until April 30, 2003. Limited to one (1) trade-in per purchase of new unit.

For complete information on how you can receive a \$ 2,000- trade in allowance or if you would like more information on available spare parts please contact illumitronics.
